To: Rusty Frishmuth <rfrishmuth@billbarrettcorp.com>

Rusty,

COGCC has reviewed the remediation project file for Remediation Project 3797 at the Indian Creek 1 (API 05-123-12706) production facility in the NENE Section 9 Township 6 North Range 66 West, Weld County.

COGCC conducted a site visit on 6/27/2013 in response to Bill Barrett Corporation's inquiry regarding the project status. Based on the COGCC site visit, it appears the surface impacts have been removed. Prior to authorizing No Further Action, COGCC requested the BBC to collect a confirmation sample from a point on the north side of CR72 and analyze for TPH.

BBC supplied a site diagram and analytical results for a surface soil sample collected on August 13, 2013.

Based on COGCC's review of the remediation project file, the June 26, 2013 site inspection, and the recent soil sampling results, it appears that no further action is necessary at this time, and COGCC approves the closure request. However, should future conditions at the site indicate contaminant concentrations in soils exceeding COGCC standards or if ground water is found to be significantly impacted, then further investigation and/or remediation activities may be required at the site. Remediation Project #3797 has been changed to resolved status in the Colorado Oil & Gas Information System. Please maintain a copy of this email as verification of closure.

Contact me with any further questions regarding this project.
