Thomason 11C-31HZX Lateral Open Hole Sidetrack

Diana,

Per our conversation on 11/3/13 @ 10:20 AM:

While drilling our 6-1/8" lateral hole section yesterday (11/2/13) we broke off two blades and lost jets from our bit. We drilled to a depth of 11,842' MD before tripping out of the hole. We plan on tripping back in the hole today (11/3/13) to a depth of 10,543' MD and performing an open hole sidetrack at an azimuth to get down and to the right of our existing hole. We will continue drilling in the Codell and will not be changing any target zones. The two blades and nozzles will remain in our old hole. We are assuming they are close to TD of 11,842'.

Let me know if you have any additional questions.

Well Information:

API#: 05-123-36004
Hole Size: 6.125"
Depth: 11,842' MD
7,396' TVD

Casing: 9-5/8" 36#, J-55, LTC @ 1,526' MD
7" 26# HCP-110 LTC @ 7,777' MD.

Sidetrack KOP: 10,543' MD.

Verbal approval from the COGCC was granted by Diana Burn on 11/3/13 @ 10:20 AM.

Please contact me if you have and questions or require any additional information.

Thank you.

Brian Peterson
