## COMMENTS:

With the addition of larger, more efficient rigs to our horizontal well program, larger pads are becoming a necessity. A confined location presents issues from a safety perspective when considering the maneuvering of heavy equipment, tools, and trucks and presents risks that can be mitigated by a slight size increase to the surface location. For the Grant Salisbury 14H-C268 location, we would like to increase our well-pad size from 400' x 500' to 435' x 600' to utilize our larger "Flex" rigs and provide adequate space to accommodate the necessary surface equipment and maneuver it safely about the location. Please see attached location drawing.
