The 30-day surface owner large equipment notice has been waived by surface owner in the SUA (highlighted). The surface owner has also acknowledged the setback exception location request. K.P. Kauffman Company, Inc. requests approval of a rule 318Aa exception location given that proposed location is closer than 500' from the section line, the request has been made through the APDs for each well on this pad. The surface owner has also acknowledged adding a new pad in the same quarter quarter where existing well is greater than fifty feet away. K.P. Kauffman Company, Inc. requests approval of a rule 318Ac exception location. The request has been made through the APDs for each well on this pad. Although powerline is further than 150' away from location, powerline will be temporarily relocated during drilling operations.

I hereby certify that the statements made in this form are, to the best of my knowledge, true, correct and complete.

Best Management Practices

No	BMP/COA Type	Description
1	General Housekeeping	Housekeeping will consist of neat and orderly storage of materials and fluids. Wastes will be temporarily stored in sealed containers and regularly collected and disposed of at offsite suitable facilities according to WMP. If spills occur prompt cleanup is required to minimize any commingling of waste materials with stormwater runoff. Routine maintenance will be limited to fueling and lubrication of equipment. Drip pans will be used during routine fueling and maintenance to contain spills or leaks. Any waste product from maintenance will be containerized and transported offsite for disposal at a certified facility. There will be no major equipment overhauls conducted onsite. Equipment will be transported offsite for major overhauls. Cleanup of trash and discarded materials will be conducted at the end of each workday. Cleanup will consist of patrolling the roadway, access areas, and other work areas to pick up trash, scrap debris, other discarded materials, any contaminated soil, and dust control on location. Materials will be disposed of properly.
2	Storm Water/Erosion Control	Storm water Management Plan (SWMP) will be in place to address construction, drilling and operations associated with oil and gas development throughout the state of Colorado in accordance with Colorado Department of Public Health and Environment (CDPHE) General Permit rules. BMP's used will vary according to location, and will remain in place until the pad reached final reclamation.
3	Material Handling and Spill Prevention	Spill Prevention Control and countermeasure plan (SPCC) is in place to address construction, drilling and operations associated with oil and gas development throughout the state of Colorado in accordance with CFR 112.
