Gentlemen,

On the RWF 911-28D, API 05-045-22176, we would like to set surface casing to 1700' TVD, 1741' MD to cover up a potential loss zone. Casing will be cemented back to surface. A sundry has been submitted, but could I get a verbal approval from one of you about this in case the job happens over the weekend? Please let me know if you have any questions. Thanks.

Justin:

As we just discussed on the phone, you have COGCC approval to change the surface-casing plans for the subject well. I will look at the Sundry you mentioned (it's in the system) soon.

Regards,

11/22/13
