A pipe connected to the produced water tanks broke during the flooding on September 13, 2013. At the northwest corner of the tank containment, the metal containment was damaged. Water was spilled to a low spot at the northwest corner of the tank containment. The area was inundated with approximately six (6) feet of flood water.	

CORRECTIVE ACTION

Describe immediate response (how stopped, contained and recovered):
Hydrovac trucks and equipment removed soil and water from the spill area. It is not known the total amount of water and soil removed during abatement activities. That information is being gathered at this time.

Describe any emergency pits constructed:
NA

How was the extent of contamination determined:
Soil and water sampling was performed at the site.

Further remediation activities proposed (attach separate sheet if needed):
Further site activities will depend upon the soil and groundwater results for samples collected from the excavation on September 21, 2013.

Describe measures taken to prevent problem from reoccurring:
Rebuilding containment around tanks and separators.
