COMMENTS:

Release tracking number is 2146755
 Attached are the laboratory analytical reports and the sample location map for the produced water release which occurred at the WPX Reda Tank Farm facility on October 18, 2013. A soil sample from the impacted area and three background samples were collected on October 18, 2013. Analytical results from the impacted area are all in compliance with Table 910-1 criteria with the exception of the following:
 Benzo[a]pyrene; 93µg/L COGCC Table 910-1 standard 22 µg/L
 Dibenzo[a,h]anthracene; 49 µg/L COGCC Table 910-1 standard 22 µg/L
 SAR; 19 COGCC Table 910-1 standard 12
 The impacted area was re-sampled on November 8, 2013 and analyzed for Benzo[a]pyrene and Dibenzo[a,h]anthracene. The results were non-detect. It is anticipated the SAR results will naturally attenuate, through natural precipitation events, to levels below 12. With the impacted area now in compliance with Table 910-1 standards for hydrocarbons WPX respectfully requests closure of this incident.
