COMMENTS:

With the addition of larger, more efficient rigs to our horizontal well program, larger pads are becoming a necessity. A confined location presents issues from a safety perspective when considering the maneuvering of heavy equipment, tools, and trucks and presents risks that can be mitigated by a slight size increase to the surface location. For the Grant Salisbury 14H-C268 location, we would like to increase our well-pad size from 400' x 500' to 435' x 600' to utilize our larger "Flex" rigs and provide adequate space to accommodate the necessary surface equipment and maneuver it safely about the location. Please see attached location drawing.

H2S REPORTING

Data Fields in this section are intended to document Sample and Location Data associated with the collection of a Gas Sample that is submitted for Laboratory Analysis.

Gas Analysis Report must be attached.

H2S Concentration: _____ in ppm (parts per million) Date of Measurement or Sample Collection _____

Description of Sample Point:

Absolute Open Flow Potential _____ in CFPD (cubic feet per day)

Description of Release Potential and Duration (If flow is not open to the atmosphere, identify the duration in which the container or pipeline would likely be opened for servicing operations.):

Distance to nearest occupied residence, school, church, park, school bus stop, place of business, or other areas where the public could reasonably be expected to frequent: _____
