To: eekblad@progressivepcs.net

Erin,

I have reviewed the referenced Form 2A Oil & Gas Location Assessment and have the following comments:

- 1) Per COGCC Rule 303.b.(3)C, a description of all oil, gas, and/or water pipelines that flow to and from this oil and gas location must be included on the Form 2A. Please be sure to include the number, size and material of all pipelines in your description.
- 2) In the Construction section you have indicated the size of the disturbed area during construction is 7,714 acres. I suspect this is a typo. Please provide me with a corrected realistic size of the disturbed area during construction and I will change it on the Form 2A.
- 3) In the Water Resources section you have indicated the estimated depth to groundwater comes from nearby Timbro Ranch & Cattle Co water well Permit #277509. A review of this water well permit indicates the total depth of the well is 200 feet and the groundwater level is not listed. A review of the next nearest water well (Permit #11401 located in Section 10 to the west) indicates the depth to groundwater is 80 feet. Therefore I will change the estimated depth to groundwater and the basis for its determination based on this information.
- 4) Your Location Drawing only shows visible improvements within 400 feet of the oil and gas location. Per COGCC Rule 303.b.(3)D Location Drawing must show all visible improvements within 500 feet of the oil and gas location. Please send me a revised Location Drawing that meets the requirements of Rule 303.b.(3)D and I will add it to the Form 2A.

Please send me the requested items by January 11, 2014. If you have any questions, please feel free to contact me. Thank you.
