To: "Andrews - DNR, Doug (doug.andrews@state.co.us)" <doug.andrews@state.co.us>, "Westerdale - DNR, Barbara (barbara.westerdale@state.co.us)" <barbara.westerdale@state.co.us>

Hi Doug

For form # 400507631:

Pipeline description:

The approximate length of pipeline to be constructed is 100 feet for the Razor 11 G Pad. All displaced materials shall be placed back into the cleared route once construction is completed. Pipeline construction will not block or change the natural course of any drainage. The pipeline will be buried wherever possible. The pipeline will be buried a minimum of 30" below the surface at all locations. Pipeline trenches shall be maintained in order to correct settlement and erosion. The pipelines will be a 8" or 6" production and 6" or 4" test. All lines will be welded steel.

Size of disturbed area:

14.74

Size after 3.50 Acres

Sorry for the typing error on this one, definitely missed that.

Change of depth ground water: A review of the next nearest water well (Permit #11401 located in Section 10 to the west) indicates the depth to groundwater is 80 feet.

I sent the new location drawing earlier today.

Is this all that is needed for the 11 G pad, with exception of the evaluations?

Erin Ekblad
