Doug,

Attached are the BMP's that are missing for this location. Please let me know if there is anything else missing, I think after you upload the info this should be off hold so it can be approved here shortly.

Thank you,

### Shannon Hartnett

Doug I agree with all of this.

Thank you,

Shannon

Shannon & Callie,

I have reviewed the referenced Form 2A Oil & Gas Location Assessment and have the following comments:

- 1) During our site visit yesterday it was agreed that this Form 2A should not be for a New Location but to Amend Existing Location 333035. Therefore, I will make this change on the Form 2A.
- 2) During our site visit yesterday it was agreed that in the Cultural Distance section, the nearest railroad should be 303 feet. Therefore, I will change this distance.
- 3) During our site visit yesterday it was agreed that the Current & Future Land Use should be changed form Dry land to Industrial. Therefore, I will change the Land Use.
- 4) A review of your Hydrology Map indicates the nearest downgradient surface water feature is

595 feet. Therefore, I will change this distance from 683 feet to 595 feet.

5) A review of the nearby water well permit (#268970) indicates that 31 feet is the total depth of the well and the static water level in 10 feet. Therefore in the Water Resources section I will change the estimated depth to groundwater from 31 feet to 10 feet.

6) Due to shallow groundwater (10 feet) in the area of the oil and gas location, in the Water Resources section I will change the Sensitive Area designation from NO to YES.

7) It appears that no Best Management Practices were included on this Form 2A. Because this oil and gas location is within a Designated Setback, please send me all applicable BMPs and I will add them to the Form 2A.

7) Because this oil and gas location is within a Designated Setback, the following Condition of Approval will be placed on the Form 2A: "Operator will comply with all applicable mitigation measures as listed in COGCC Rule 604.c."

8) Although you have provided waivers to the Rule 305.a. Pre-application notification, because this oil and gas location is within an Exception Zone, per COGCC Rule 604.a.(1)B, after the comment period ends on 12/30/13 I need a letter certifying that Great Western has complied with Rule 305.c. (OGLA Notice) and 306.e. (Meeting requirement) which I will add to the Form 2A.

Please respond with the requested items by January 13, 2014. If you have any questions, please feel free to contact me. Thank you.

Shannon,

Now that the public comment period has closed, please let me know if any meetings with Building Unit owners and Great Western occurred and if any concerns were expressed by the Building Unit owners either during a meeting or in any correspondence (phone, letter, email, etc.) with Great Western.

As a final step in the Form 2A notification process, per COGCC Rule 604.a.(1)B, please send me a signed letter on Great Western letterhead certifying that Great Western has complied with both Rule 305.c. (OGLA Notice) and Rule 306.e. (Meeting requirements). Thank you.

Thank you.
