Alex,

I wanted to touch base with you about the Allard pit. We discussed a couple months ago that it would probably be spring before weather and water conditions allowed us to finish remediation of the pit at the Allard location (API # 057-06124). However, when we submitted the sundry notice after our discussion, I promised an end-of-year update.

Our consultant just visited the location a week ago and the water level is still fairly high.

Just wanted to let you know that this project is still on my(our) radar and we will close out the pit as soon as it is feasible.

Thank you for your continued help to get this resolved. Let me know if you have any questions.

Merry Christmas!

**Rachel Eisterhold**
