Jake,

I have reviewed the referenced Form 2A Oil & Gas Location Assessment and have a few comments:

- 1) During my review, it appears the Land Use for this oil and gas location is not CRP Crop Land but Rangeland. Have you confirmed with the surface owner that this oil and gas location is on CRP Crop Land?
- 2) Because this oil and gas location is within the Northern High Plains Designated Groundwater Basin, it is by definition a Sensitive Area. Therefore, in the Water Resources section I will change the Sensitive Area designation from NO to YES.
- 3) You have included a comment indicating you will submit a revised Location Drawing depicting the change in the power pole location. Please send me the revised Location Drawing and I will replace it on the Form 2A.

Please respond to this correspondence by February 10, 2014. If you have any questions, please feel free to contact me. Thank you.

Hi Doug,

It's our understanding that the north half of section 5 is all CRP. I've seen the land owner out there in the past 6 months spraying weeds and planting native grasses to satisfy the CRP obligations.

Please see the attached revised location drawing.

We agree and accept all other changes.

Thanks,

Jake
