Description of Well Site and Construction Area

1-3 acre site with access road for drilling of oil and gas well. Terrain is rolling with native grass and sagebrush. Surface Roughening will be used on low side of drill site to reduce speed of runoff, increase infiltration, reduce erosion, trap sediment and prepare soil for reseeding. No mud or water drilling pits. Drilling mud, water based, will be spread on slope off low side of location and disked in within 10 days. Portable water tanks will be used for water pit. Topsoil will be separated and spread on drill site as final operation before reseeding operations which will be completed within 6 months weather permitting. To prevent soil erosion site will be disked and straw crimped in or manure spread.

Stormwater Management Plan (SWMP) is on file in Wiepking-Fullerton Energy, L.L.C. office.

Spill Prevention, Control and Countermeasure Plan is on file in Wiepking-Fullerton Energy, L.L.C. office.
