Rick,

Yes we do have post-evacuation confirmation soil samples- I'll get a copy of the sample data from our consultant and pass on.

I'll check with our consultant on where the landfarmed samples were taken..

Rachel,

I am reviewing Foundation Energy's pit closure request for the Hillman pit. Can you address the following questions?

Does Foundation Energy have post-excavation confirmation soil samples from the pit demonstrating that the soil in the bottom of the pit meets Table 910-1 Standards?

Where the land farm samples collected from within the treatment piles or from the ground surface beneath the piles. The letter report mentions 2" below ground surface. Please clarify what was sampled.

Regards,

Rick Allison, P.G.
