Mr. Brandon Danforth  
Environmental Specialist  
WPX Energy  
1058 County Road 215  
Parachute, Colorado 81635

**RE: GM 24-12 Drill Pad Baseline Water Quality Evaluation**

Dear Mr. Danforth,

Western Water & Land, Inc. (WWL) has completed a hydrologic water source evaluation for the WPX Energy Rocky Mountain LLC (WPX) GM 24-12 Drill Pad in accordance with COGCC Rule 609. Drill Pad GM 24-12 is located in SW1/4, SW1/4, Section 12, Township 7 S, Range 96 W. The evaluation considered all water sources as defined in Rule 609 within a 0.5-mile radius of the referenced drill pad. Water sources located on the basis of section quarters were included in the evaluation if the any portion of the section quarter(s) lies within the 0.5-mile radius area. A preliminary screening of the water sources was completed to identify the sources considered to be potentially available for sampling pending results of the owner questionnaire and field inspections to verify sampling feasibility and the consent of the structure owners. Each potentially available water source was then evaluated to identify the preferred sources for the baseline program. If the resulting number of potentially available sources was four or less, all of the sources were included in the list of preferred sources. If more than four sources were potentially available, the sources were prioritized based on WWL's hydrologic knowledge of the region, general hydrologic rationale, and in accordance with the guidelines specified in Rule 609.

**Water Sources**

Water sources as defined in Rule 609 include water wells registered with the Colorado Division of Water Resources (DWR), permitted or adjudicated springs, and monitoring wells installed for baseline sampling and monitoring under COGCC Rules 318A.e(4), 608, or 609. Water sources located within a 0.5-mile radius of the GM 24-12 Drill Pad are shown in Figure 1. Well permit files and/or water right files are included for all wells located within the 0.5-mile radius evaluation area in Attachment A. Structure owners are identified as reported in DWR databases. Property owners are identified as reported in county property records. The water sources within a 0.5-mile radius of the drill pad are summarized as follows:

- Glenn Well (Water right associated with Water Well Permit No. 51945-F)
  - Applicant/Owner:  
West Divide Water Conservancy District  
818 Taughenbaugh Blvd.  
Rifle, CO 81650

- Property owner:  
John Lyons Family Partnership, LP  
8714 County Road 300  
Parachute, CO 81635
- Case No.: 02CW0281
- Decree Rate: 0.378 cfs (conditional)
- Decreed Use(s): Domestic
  
- Water Well Permit No. 51945-F
  - Applicant/Owner:  
Glenn Meadows Home Owners Association  
854 W Battlement Pkwy  
Parachute, CO 81635
  - Property owner:  
William Woods  
PO Box 775  
Parachute, CO 81635
  - Use(s): Domestic, Augmented
  - Well Depth: 57 ft.
  - Well Yield: 15 gpm
  
- Water Well Permit No. 206259
  - Applicant/Owner:  
Crystal Glenn  
PO Box 240  
Parachute, CO 81635
  - Property owner:  
Carl & Christina Metcalf  
4827 County Road 300  
Parachute, CO 81635
  - Use(s): Domestic
  - Well Depth: 60 ft.
  - Well Yield: 15 gpm

### **Potentially Available Water Sources**

Each water source identified within the 0.5-mile radius area is considered to be a potentially available water source unless existing information suggests that the water source would not be suitable for the baseline water quality program. Then Glenn Well water right is associated with Water Well Permit No. 51945-F so they are not considered to be separate sources. The following water sources are considered potentially available for inclusion in the program:

- Water Well Permit No. 51945-F (the diversion comments presented on the Structure Summary Report for the Glenn Well water right indicate that the structure was not usable in 2011 and 2012; however, the structure is considered potentially available unless it is confirmed that the structure is currently unusable based on discussions with the well/property owner or onsite inspection)
  
- Water Well Permit No. 206259

### **Preferred Water Sources**

In accordance with Rule 609, all available water sources within a 0.5-mile radius of the drill pad, up to a maximum of four sources, must be included in the baseline and subsequent monitoring program. Because only two potentially available water sources were identified they are considered to be preferred water sources. Groundwater from these wells is expected to be produced from a shallow aquifer source. The preferred potentially available water sources are as follows:

- Water Well Permit No. 51945-F (the diversion comments presented on the Structure Summary Report for the Glenn Well water right indicate that the structure was not usable in 2011 and 2012; however, the structure is considered a preferred source unless it is confirmed that the structure is currently unusable based on discussions with the well/property owner or onsite inspection)
- Water Well Permit No. 206259

The preferred water sources will be incorporated into the baseline water quality monitoring program provided the structure owner, or land owner if the structure owner is not known, grants approval to sample the source and inspection of the structure confirms that a representative sample can be obtained from the structure.

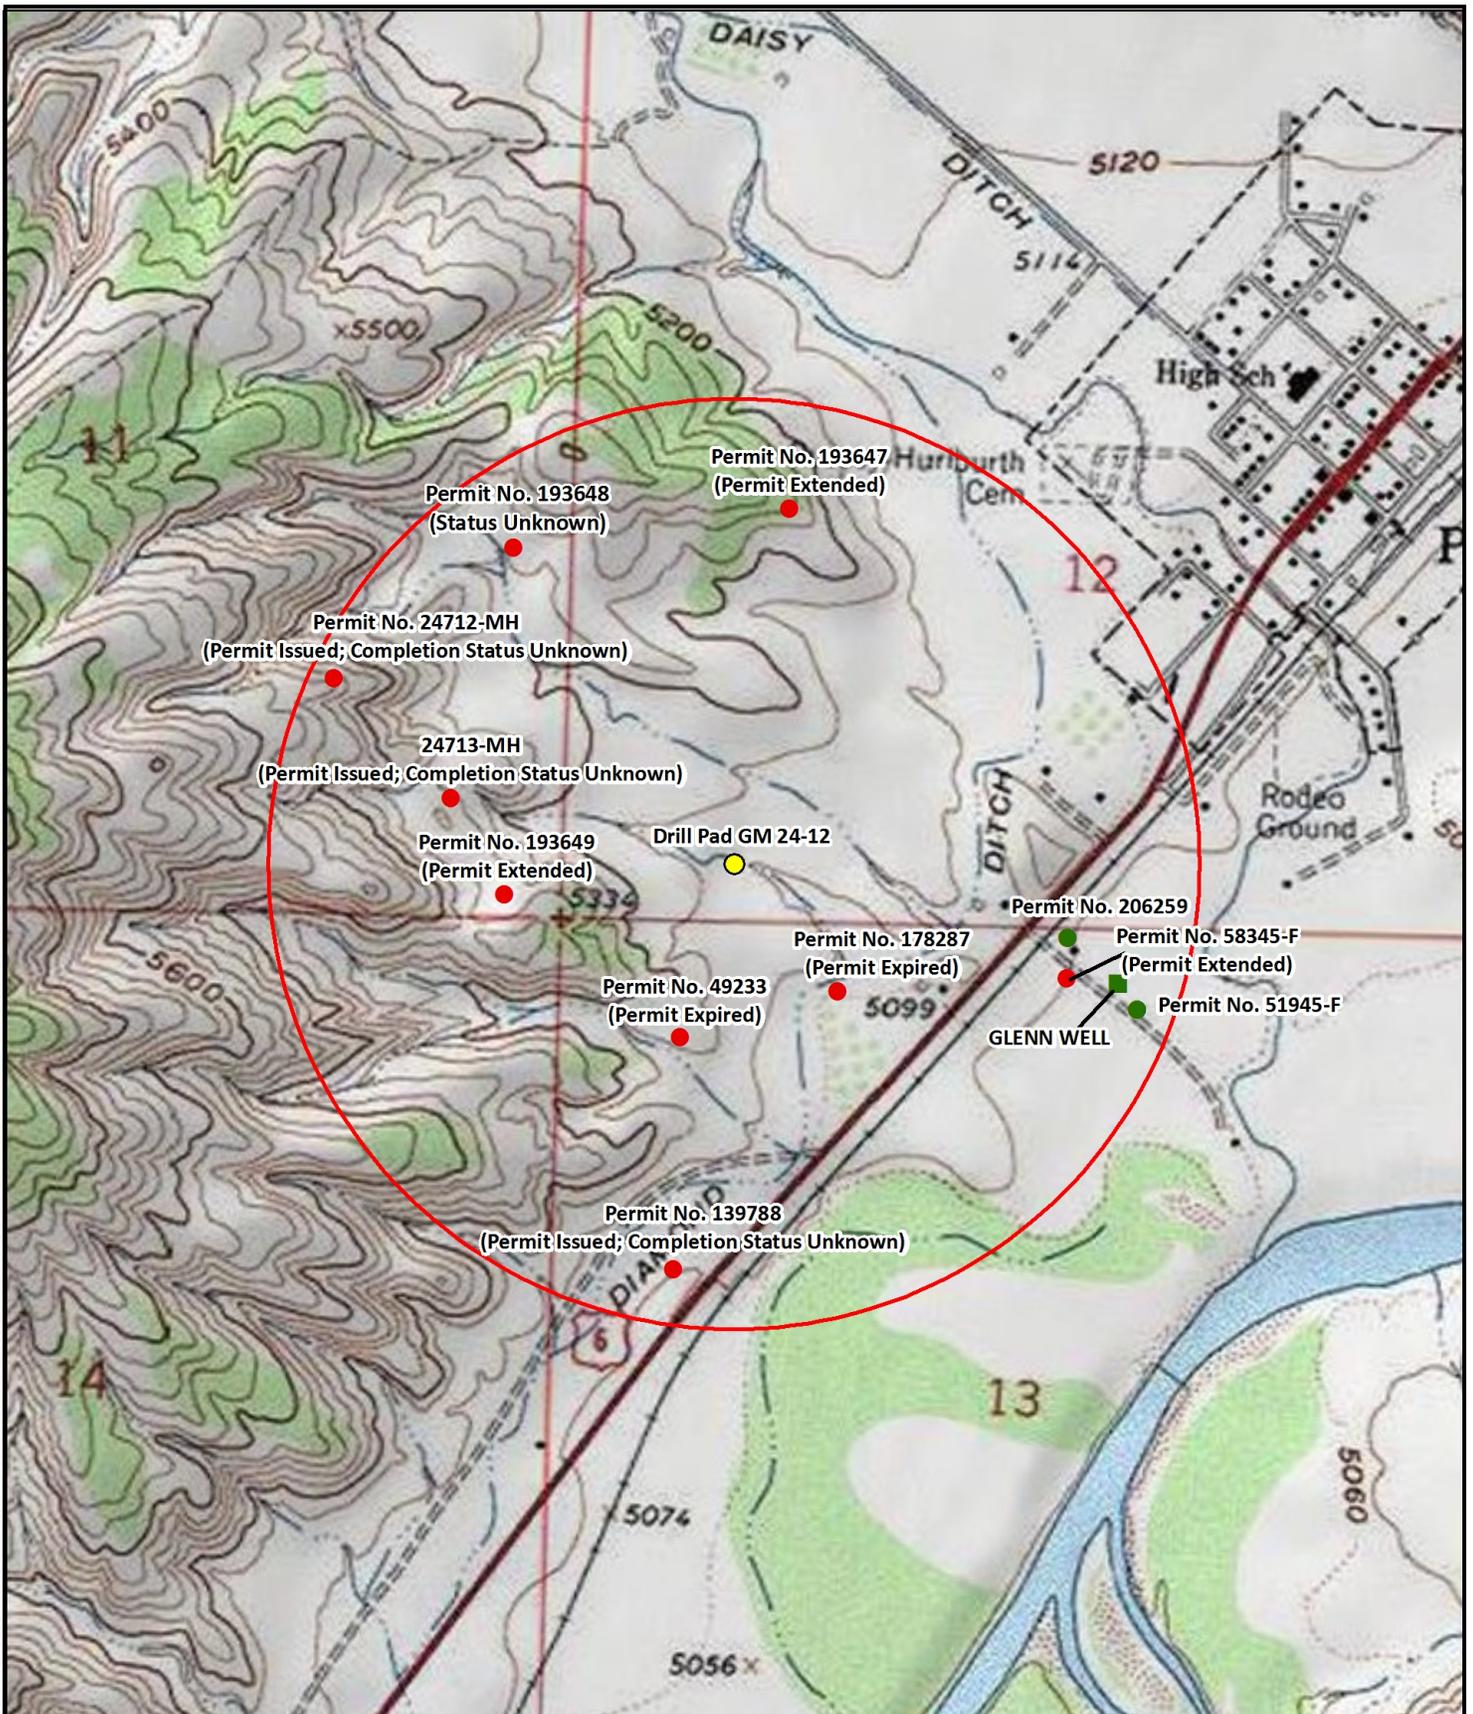

If you have any questions or concerns, please contact me at (970) 242-0170.

Sincerely,

Bruce D. Smith  
Principal Hydrogeologist  
WESTERN WATER & LAND, INC.

## INSTRUCTIONS FOR PUMP INSTALLATION REPORT

The report must be typed or printed in **BLACK INK**. All changes on the form must be initialed and dated. Attach additional sheets if more space is required. Each additional sheet must be identified at the top by the well owner's name, the permit number, form name/number and a sequential page number. Report depths in feet below ground surface.

This form may be reproduced by photocopy methods, or by computer generation with prior approval by the State Engineer. Photocopy reproductions must retain margins and print quality of the original form.

The original form must be submitted to the State Engineer's Office within 60 days after completing the well or 7 days after the permit expiration date, whichever is earlier.

A copy of the form must be provided to the well owner.

If this form is submitted in conjunction with the Well Completion and Test Report, form number GWS-31, ONLY THE PERMIT NUMBER AND OWNER NAME NEED TO BE COMPLETED in items 1 and 2.

1. Complete the **Permit Number** in full.
2. Fill in **Name and Mailing Address of Well Owner** where correspondence should be sent.
3. Complete the blocks for the **actual** location of the well. For wells located in subdivisions the lot, block and subdivision information must also be provided.
4. Indicate the type of pump installed and complete the requested information. When installing pumps greater than 50 gpm, complete the additional information in this area.
5. Provide the information on other equipment which may be installed in the well.
6. Report test data as required by Rule 13.9. Spaces are provided to report all measurements made during the test. The report should show that the test complied with the provisions of the rules. If a test was not performed explain when it will be done. If available, report clock time when measurements were taken.
7. Record the type and the amount of disinfection used, how placed and the length of time left in the hole.
8. Indicate if a water quality analysis was performed and submit a copy of the report if available.
9. Use the remarks area to note any additional information including additional equipment installed, water supply construction problems.
10. Fill in **Company Name and Address of Contractor** who installed pumping equipment. The report must be signed by the licensed contractor responsible for the installation of pumping equipment.

PERMIT TO CONSTRUCT A WELL

APPROVED WELL LOCATION  
GARFIELD COUNTY

NW 1/4 NE 1/4 Section 13  
Twp 7 S Rng 96 W 6th P.M.

DISTANCES FROM SECTION LINES

450 Ft. from NORTH Section Line  
2100 Ft. from EAST Section Line

ISSUANCE OF THIS PERMIT DOES NOT CONFER A WATER RIGHT

CONDITIONS OF APPROVAL

- 1) This well shall be used in such a way as to cause no material injury to existing water rights. The issuance of the permit does not assure the applicant that no injury will occur to another vested water right or preclude another owner of a vested water right from seeking relief in a civil court action.
- 2) The construction of this well shall be in compliance with the Water Well Construction Rules 2 CCR 402-2, unless approval of a variance has been granted by the State Board of Examiners of Water Well Construction and Pump Installation Contractors in accordance with Rule 18.
- 3) Approved pursuant to CRS 37-90-137(2) for the construction of a well, appropriating ground water tributary to the Colorado River, as an alternate point of diversion to the Avalanche Canal and Siphon, on the condition that the well shall be operated only when the West Divide Water Conservancy District's substitute water supply plan, approved by the State Engineer, is in effect and when a water allotment contract between the well owner and the West Divide Water Conservancy District for the release of replacement water from Ruedi Reservoir is in effect, or under an approved plan for augmentation. WDWCD contract #990608-CG(a).
- 4) The use of ground water from this well is limited to ordinary household purposes inside one (1) single family dwelling, the irrigation of not more than 6,000 square feet (0.14 of an acre) of home gardens and lawns, and the watering of domestic animals, all located on a residential site of ±9.72 acres described as lot 1, block 2, Glenn Subdivision, Garfield County. All use of this well will be curtailed unless the water allotment contract or a plan for augmentation is in effect.
- 5) The maximum pumping rate shall not exceed 15 GPM.
- 6) The average annual of amount of ground water to be appropriated shall not exceed one (1) acre-foot (325,850 gallons).
- 7) A totalizing flow meter must be installed on this well and maintained in good working order. Permanent records of all diversions must be maintained by the well owner (recorded at least annually) and submitted to the Division Engineer upon request.
- 8) The well shall be constructed not more than 200 feet from the location specified on this permit.
- 9) The owner shall mark the well in a conspicuous place with well permit number(s), name of the aquifer, and court case number(s) as appropriate. The owner shall take necessary means and precautions to preserve these markings.
- 10) This permit has been approved for the location, use and annual appropriation noted above. You are hereby notified that you have the right to appeal the issuance of this permit, by filing a written request with this office within sixty (60) days of the date of issuance, pursuant to the State Administrative Procedures Act. (See Section 24-4-104 through 106, C.R.S.).

## RESIDENTIAL APPLICATIONS - GENERAL INSTRUCTIONS

There are a variety of uses for ground water in Colorado. This form (GWS-44) can be used when applying for a permit for a new well or replacement of an existing well for the following types of uses:

**ORDINARY HOUSEHOLD USE** inside one single family residence (NO outside water use allowed)  
**OTHER RESIDENTIAL USE** (sometimes referred to as domestic use) which may include use in up to three single-family residences, watering of up to one acre of home gardens and lawns, and watering of domestic animals  
**LIVESTOCK WATERING** on a farm, ranch, range, or pasture

If you are applying for a NEW household use only well, or for a NEW 35+ acre residential well outside the Denver Basin or Designated Basins of eastern Colorado, please use simplified forms GWS-49 or GWS-50. DO NOT use this form for registration of an existing unpermitted well (Use Form GWS-12), monitoring/observation wells (Use Form GWS-46), gravel pit wells (Use Form GWS-27), or for other uses not listed above, including - commercial, industrial, crop irrigation, municipal, etcetera (Use GENERAL PURPOSE Form GWS-45).

**FEES** Applications must be submitted with the appropriate required non-refundable filing fees. The required filing fee for most well permit applications is \$60. The filing fees for replacement or deepening well permit applications for most previously permitted residential and livestock water wells is \$20. Checks should be payable to the COLORADO DIVISION OF WATER RESOURCES.

Applications are evaluated in chronological order. Please allow approximately six weeks for processing.

---

APPLICATIONS must be completed clearly, and legibly, in BLACK INK or typed. ALL ITEMS in the application must be completed. Incomplete applications may be returned to the applicant for more information. Do not change or alter the application in any way.

THE LOCATION of the well in item 4 must be correctly and accurately described. The county, quarter/quarter, section, township, range, principal meridian, and distance from section lines must be provided.

NOTE: Distances are not necessarily the same distances as the distances from (your) property lines.

For additional assistance in describing the location of your well, review the publication entitled "How to Determine Well Location", which was provided with your packet, or can be requested from any Colorado Division of Water Resource office.

A LEGAL DESCRIPTION of your lot or parcel of land is required in item 5. For tracts of less than 35 acres approval may depend upon whether the tract was created by a division of land after June 1, 1972. If your lot is less than 35 acres in size, it would be prudent to have a deed or legal description that shows your tract was divided from a larger tract prior to June 1, 1972. This may be accomplished by obtaining a copy of a deed for the tract issued prior to June 1, 1972.

An ORIGINAL signature must be on each application. The applicant's authorized agent may sign the application, if a letter signed by the applicant is submitted with the application authorizing them to act as agent for the purpose of obtaining a well permit.

IF YOU HAVE ANY QUESTIONS regarding any item on the application form, please call the Division of Water Resources Ground Water Information Desk (303-866-3587), or the nearest Division of Water Resources Field Office located in Greeley (970-352-8712), Pueblo (719-542-3368), Alamosa (719-589-6683), Montrose (970-249-6622), Glenwood Springs (970-945-5665), Steamboat Springs (970-879-0272), or Durango (970-247-1845).

Crystal Glenn  
P. O. Box 240  
Parachute, CO 81635

Dear Ms. Glenn:

Enclosed is your approved contract #990608CG(a). Please read the contract carefully if you have not already done so, but please especially note paragraph 2 concerning availability of water.

West Divide obtains its storage water from a number of sources including Ruedi Reservoir and Green Mountain Reservoir which are Bureau of Reclamation projects. Federal policy relating to endangered species, among other environmental concerns, provides that supplies from these reservoirs may be interruptible. Moreover, the forces of nature are always such that no source of water can be guaranteed from year to year. West Divide continues to make good-faith efforts to obtain alternative long-term supplies in an effort to make reliable and predictable the water supply anticipated by your contract with us.

This water allotment contract may require you to obtain a well permit from the State Engineer's office. Once your well is drilled you are required to install a measuring device and submit a meter reading to West Divide. You will be provided with a special form for this purpose upon notification that your well has been drilled.

Non-compliance with measuring and reporting requirements are grounds for cancellation of your water allotment contract with West Divide. This could result in action by the State Engineer which could prevent your further use of your well.

Sincerely yours,

*Janet Maddock*

WEST DIVIDE WATER CONSERVANCY DISTRICT  
WATER ALLOTMENT CONTRACT/LEASE

Name of Applicant: Crystal Glenn

Quantity of Water in Acre Feet: 1

Applicant, hereby applies to the West Divide Water Conservancy District, a political subdivision of the State of Colorado, organized pursuant to and existing by virtue of C.R.S. 1973, §37-45-101, et seq., (hereinafter referred to as the "District") for an allotment contract/lease to beneficially and perpetually use water or water rights owned, leased, or hereafter acquired by the District. By execution of this contract/lease and the attached application, Applicant hereby agrees to the following terms and conditions:

1. Water Rights: Applicant shall own water rights at the point of diversion herein lawfully entitling Applicant to divert water, which will be supplemented and augmented by water leased herein. If Applicant intends to divert through a well, it must be understood by Applicant that no right to divert exists until a valid well permit is obtained from the Colorado Division of Water Resources.

2. Quantity: Water applied for by the Applicant in the amount set forth above shall be diverted at Applicant's point of diversion from the District's direct flow water rights, and when water is unavailable for diversion pursuant to administration by the Colorado State Engineer during periods when said direct flow water right is not in priority, the District shall release for the use of Applicant up to said quantity in acre feet per year of storage water owned or controlled by the District. It is understood that any quantity allotted from direct flow, storage or otherwise, to the Applicant by the District will be limited by the priority of the District's decrees and by the physical and legal availability of water from District's sources. Any quantity allotted will only be provided so long as water is available and the Applicant fully complies with all of the terms and conditions of this contract/lease. The District and the Applicant recognize that some of the District's decrees may be in the name of the Colorado River Water Conservation District, and the ability of the District to allot direct flow right to the Applicant may be dependent on the consent of the Colorado River Water Conservation District. If at any time the Applicant determines it requires less water than the amount herein provided, Applicant may so notify the District in writing, and the amount of water allotted under this contract/lease shall be reduced permanently in accordance with such notice. Rates shall be adjusted accordingly in following water years only.

3. Beneficial Use and Location of Beneficial Use: Any and all water allotted Applicant by the District shall be used for the following beneficial use or uses: municipal, domestic and related uses, or commercial (except to the extent that Ruedi Reservoir water may not be available for commercial as that term is defined on Page 5 of Contract No. 2-07-70-W0547 between the United States and the West Divide Water Conservancy District). Applicant's beneficial use of any and all water allotted shall be within or through facilities or upon land owned, leased, operated, or under Applicant's control.

4. Decrees and Delivery: Exchange releases made by the District out of storage from Ruedi Reservoir and Green Mountain Reservoir, or other works or facilities of the District, or from other sources available to the District, shall be delivered to the Applicant at the outlet works of said storage facilities or at the decreed point of diversion for

AUG 20 1999

WATER RESOURCES DISTRICT  
COLORADO

said other sources, and release or delivery of water at such-outlet or points shall constitute performance of the District's total obligation. Delivery of water by the District from Ruedi Reservoir or Green Mountain Reservoir shall be subject to the District's lease contracts with the United States Bureau of Reclamation. Releases from other facilities available to District shall be subject to the contracts, laws, rules, and regulations governing releases therefrom. Furthermore, the District hereby expressly reserves the right to store water and to make exchange releases from structures that may be built or controlled by the District in the future, so long as the water service to the Applicant pursuant to this agreement, is not impaired by said action. Any quantity of the Applicant's allocation not delivered to or used by Applicant by the end of each water year (October 1), shall revert to the water supplies of the District. Such reversion shall not entitle Applicant to any refund of payment made for such water.

Water service provided by the District shall be limited to the amount of water available in priority at the original point of diversion of the District's applicable water right, and neither the District, nor those entitled to utilize the District's decrees, may call on any greater amount at new or alternate points of diversion. The District shall request the Colorado Division of Water Resources to estimate any conveyance losses between the original point and any alternate point, and such estimate shall be deducted from this amount in each case.

5. Alternate Point of Diversion and Plan of Augmentation: Decrees for alternate points of diversion of the District's water rights or storage water may be required in order for Applicant to use the water service contemplated hereunder. Obtaining such decree is the exclusive responsibility of Applicant. The District reserves the right to review and approve any conditions which may be attached to judicial approval of said alternate point of diversion as contemplated or necessary to serve Applicant's facilities or lands. Applicant acknowledges and agrees that it shall be solely responsible for the procedures and legal engineering costs necessary for any changes in water rights contemplated herein, and further agrees to indemnify the District from any costs or losses related thereto. Applicant is solely responsible for providing works and facilities necessary to obtain/divert the waters at said alternate point of diversion and deliver them to Applicant's intended beneficial use. Irrespective of the amount of water actually transferred to the Applicant's point of diversion, the Applicant shall make annual payments to the District based upon the amount of water allotted under this contract/lease.

In the event the Applicant intends to apply for an alternate point of diversion and to develop an augmentation plan and institute legal proceedings for the approval of such augmentation plan to allow the Applicant to utilize the water allotted to Applicant hereunder, the Applicant shall give the District written notice of such intent. In the event the Applicant develops and adjudicates its own augmentation plan to utilize the water allotted hereunder, Applicant shall not be obligated to pay any amount under Paragraph 19 below. In any event, the District shall have the right to approve or disapprove the Applicant's augmentation plan and the Applicant shall provide the District copies of such plan and of all pleadings and other papers filed with the water court in the adjudication thereof.

6. Contract/lease Payment: Non-refundable, one time administrative charge, in the amount determined by the Board of Directors of the District from time to time, shall be submitted with the application for consideration by the District.

Annual payment for the water service described herein shall be determined by the Board of Directors of the District. The initial annual payment shall be made in full, within thirty (30) days after the date of notice to the Applicant that the initial payment is due. Said notice will advise the Applicant, among other things, of the water delivery year to which the initial payment shall apply and the price which is applicable to that year.

Annual payments for each year thereafter shall be due and payable by the Applicant on or before each January 1. If an annual payment is not made by the due date a flat \$50 late fee will be assessed. Final written notice prior to cancellation will be sent certified mail, return receipt requested, to the Applicant at such address as may be designated by the Applicant in writing or set forth in this contract/lease or application. Water use for any part of a water year shall

RECEIVED,  
AUG 20 1999

require payment for the entire water year. Nothing herein shall be construed so as to prevent the District from adjusting the annual rate in its sole discretion for future years only.

If payment is not made within fifteen (15) days after the date of said written notice, Applicant shall at District's sole option have no further right, title or interest under this contract/lease without further notice, and delivery may be immediately curtailed. The allotment of water, as herein made, may be transferred, leased, or otherwise disposed of at the discretion of the Board of Directors of the District.

Upon cancellation of this water allotment contract/lease with the District, the District shall notify the Division of Water Resources offices in Denver and Glenwood Springs. The Division of Water Resources may then order cessation of all water use.

7. Additional Fees and Costs: Applicant agrees to defray any expenses incurred by the District in connection with the allotment of water rights hereunder, including, but not limited to, reimbursement of legal and engineering costs incurred in connection with any water rights and adjudication necessary to allow Applicant's use of such allotted water rights.

8. Assignment: This contract/lease shall inure to the benefit of the heirs, successors or assigns of the parties hereto. Any assignment of the Applicant's rights under this contract/lease shall be subject to, and must comply with, such requirements as the District may hereafter adopt regarding assignment of contract/lease rights and the assumption of contract/lease obligations by assignees and successors. Nothing herein shall prevent successors to a portion of Applicant's property from applying to the District for individual and separate allotment contracts/leases. No assignment shall be recognized by the District except upon completion and filing of proper forms for change of ownership.

Upon the sale of the real property to which this contract/lease pertains, Applicant has a duty to make buyer aware of this contract/lease and proper forms for change of ownership must be completed.

9. Other Rules: Applicant shall be bound by the provisions of the Water Conservancy Act of Colorado; by the rules and regulations of the Board of Directors of the District; and all amendments thereof and supplements thereto and by all other applicable law.

10. Operation and Maintenance Agreement: Applicant shall enter into an "Operation and Maintenance Agreement" with the District under terms and conditions determined by the board of Directors of the District, if and when, the Board of said District determines in its sole discretion that such an agreement is required. Said agreement may contain, but shall not be limited to, provisions for additional annual monetary consideration for extension of District delivery services and for additional administration, operation, and maintenance costs; or for other costs to the District which may arise through services made available to the Applicant.

11. Change of Use: The District reserves the exclusive right to review, reapprove or disapprove any proposed change in use of the water allotted hereunder. Any use other than that set forth herein or any lease or sale of the water or water rights allotted hereunder without the prior written approval of the District shall be deemed to be a material breach of this contract/lease.

12. Use and Place of Use: Applicant agrees to use the water in the manner and on the property described in the documents submitted to the District at the time this contract/lease is executed, or in any operation and maintenance agreement provided by Applicant. Any use other than as set forth thereon or any lease or sale of the water or water rights herein, other than as permitted in paragraph 8 above, shall be deemed to be a material breach of this agreement.

AUG 20 1999

13. Title: It is understood and agreed that nothing herein shall be interpreted to give the Applicant any equitable or legal fee title interest in or to any water or water rights referred to herein.

WATER RESOURCES  
STATE ENGINEER  
COLO.

14. Conservation: Applicant shall use commonly accepted conservation practices with respect to the water and water rights herein, and hereby agrees to be bound by any conservation plan adopted hereafter by the District for use of District owned or controlled water or water rights.

15. Restrictions: Applicant shall restrict actual diversions to not exceed the Contract/Lease amount, which provides water (on the formula of one acre foot per dwelling) for ordinary household purposes inside one single family dwelling, the watering of domestic livestock, fire protection, and the irrigation of up to 6,000 square feet of lawn and garden.

Applicant shall also comply with all restrictions and limitations set forth in the well permit obtained from the Colorado Division of Water Resources.

Watering of livestock shall be restricted to Applicant's domestic animals not to be used for commercial purposes unless Applicant obtains approval from the Colorado Division of Water Resources for commercial use/livestock watering at a horse boarding facility, provided that in no event shall actual diversions exceed the amount of water provided by this Contract/Lease.

Violation of this paragraph 15 shall be deemed to be a material breach of this Contract/Lease.

16. Well Permit: If Applicant intends to divert through a well, then Applicant must provide to District a copy of Applicant's valid well permit before District is obligated to deliver any water hereunder.

17. Measuring Device or Meter: Applicant agrees to provide, at its own expense, a totalizing flow meter with remote readout to continuously and accurately measure at all times all water diverted pursuant to the terms of Applicant's water right and the terms of this contract/lease. Applicant agrees to provide accurate readings from such device or meter to District upon District's request. Applicant acknowledges that failure to comply with this paragraph could result in legal action to terminate Applicant's diversion of water by the State of Colorado Division of Water Resources. By signing this contract, Applicant hereby specifically allows District, through its authorized agent, to enter upon applicant's property during ordinary business hours for the purposes of determining applicant's actual use of water.

18. Representations: By executing this contract/lease, Applicant agrees that it is not relying on any legal or engineering advice that Applicant may believe has been received from the District. Applicant further acknowledges that it has obtained all necessary legal and engineering advice from Applicant's own sources other than the District. Applicant further acknowledges that the District makes no guarantees, warranties, or assurances whatsoever about the quantity or quality of water available pursuant to this contract/lease. Should the District be unable to provide the water contracted for herein, no damages may be assessed against the District, nor may Applicant obtain a refund from the District.

19. Costs of Water Court Filing and Augmentation Plan: Should the District, in its own discretion, choose to include Applicant's contract/lease herein in a water court filing for alternate point of diversion or plan of augmentation, then Applicant hereby agrees to pay to the District, when assessed, an additional fee representing the District's actual and reasonable costs and fees for Applicant's share of the proceedings.

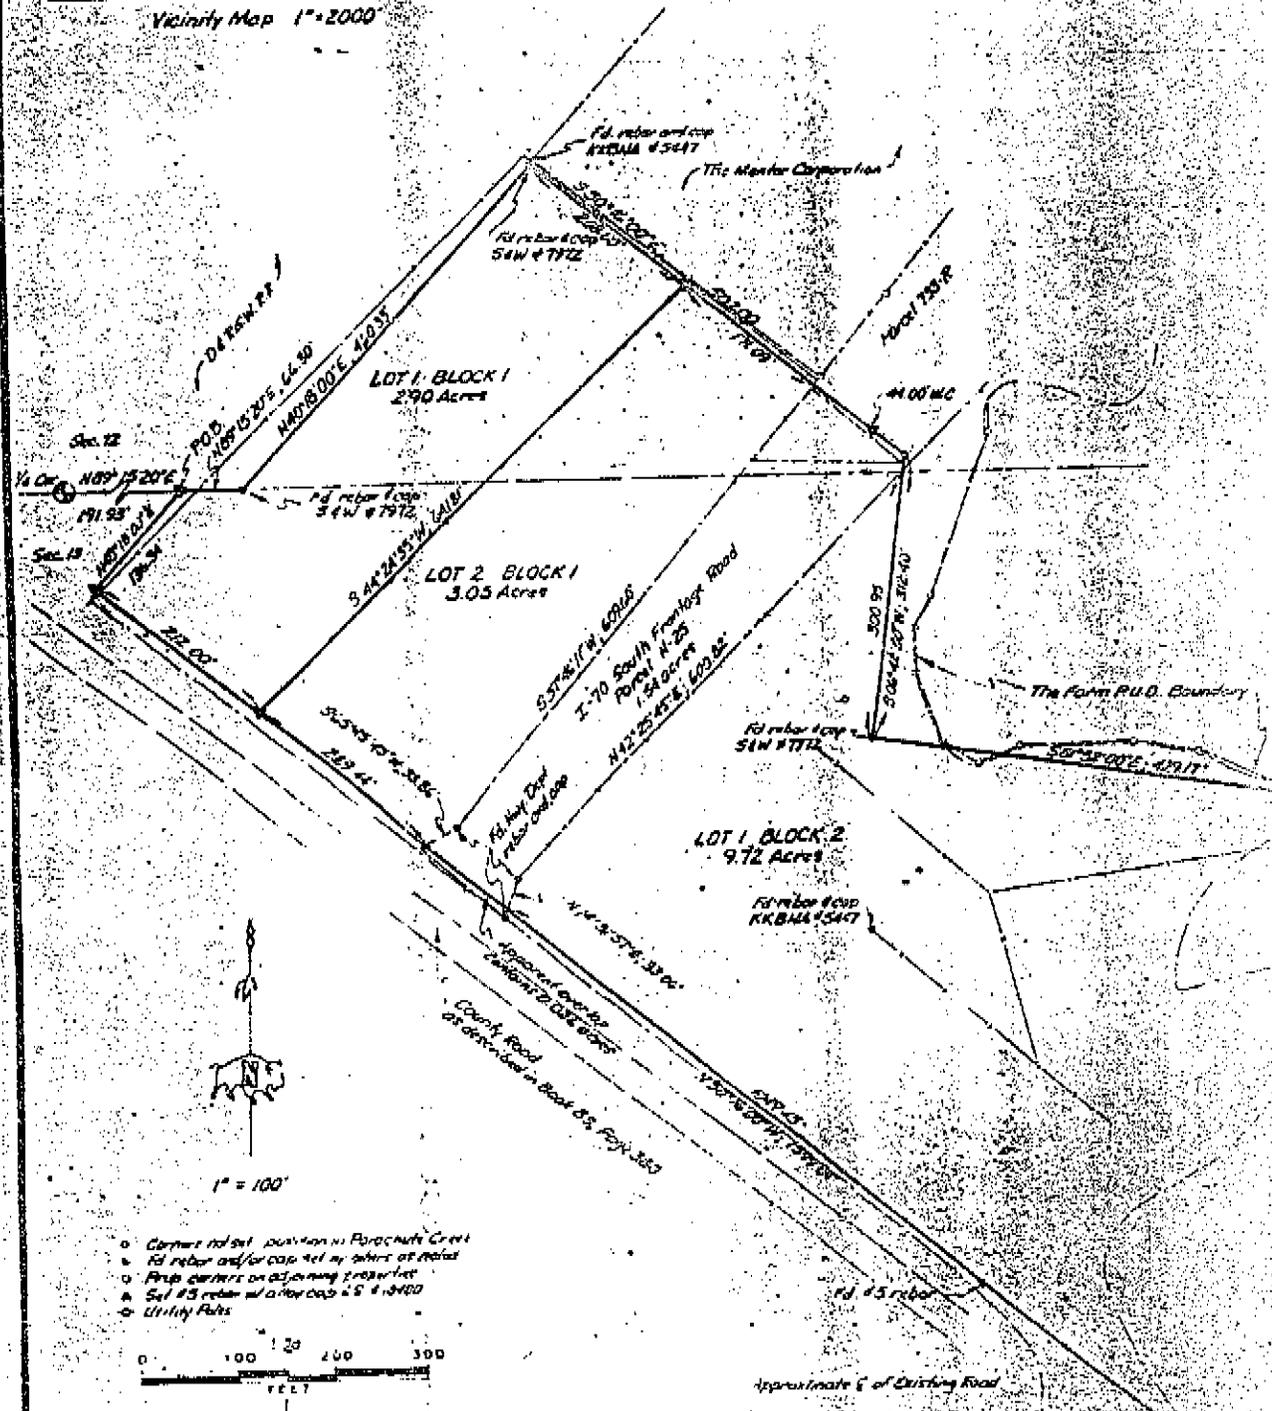

20. Binding Agreement: This agreement shall not be complete nor binding upon the District unless attached hereto is the form entitled "Application and Data Form to Lease Water From West Divide Water Conservancy District" fully completed by Applicant and approved by the District's engineer. Said attachments shall by this reference thereto be incorporated into the terms of this agreement.

ISSUANCE OF THIS PERMIT DOES NOT CONFER A WATER RIGHT  
CONDITIONS OF APPROVAL

- 1) This well shall be used in such a way as to cause no material injury to existing water rights. The issuance of the permit does not assure the applicant that no injury will occur to another vested water right or preclude another owner of a vested water right from seeking relief in a civil court action.
- 2) The construction of this well shall be in compliance with the Water Well Construction Rules 2 CCR 402-2, unless approval of a variance has been granted by the State Board of Examiners of Water Well Construction and Pump Installation Contractors in accordance with Rule 18.
- 3) This well is recorded, and permit approved, in accordance with CRS 37-92-602(5) for historic use as indicated herein and described in CRS 37-92-602(1)(b), being a well producing 15 GPM and used for ordinary household purposes inside one (1) single family dwelling, fire protection, the watering of domestic animals and poultry, and the irrigation of not more than 7,000 of home gardens and lawns. This well is located and used on parcel A of the Glenn Subdivision, Town of Parachute. Further identified as: 8612 Hwy 6 & 24, Parachute, Colorado.
- 4) The date of first beneficial use, as claimed by the applicant is 1945.

NOTE: Parcel Identification Number (PIN): 23-2409-131-03-003  
County Assessor Tax Schedule Number: 480051

Crystal Glenn Crystal Glenn 11/25/97

FOR OFFICE USE ONLY

Certain wells not previously registered or permitted may be registered pursuant to C.R.S. 37-92-602(5). The wells must have been constructed and put to beneficial use prior to May 8, 1972. The types of wells that may be registered are identified as follows:

- 1) Wells not exceeding fifteen gpm which are used for ordinary household purposes, fire protection, the watering of poultry, domestic animals and livestock on farms and ranches, and the irrigation of not over one acre of home gardens and lawns, but not used for more than three single family dwellings.
- 2) Wells not exceeding fifty gpm which are in production as of May 22, 1971, and were and are used for the purposes described in (1) above.
- 3) Wells not exceeding fifteen gpm which are used for drinking and sanitary facilities in individual commercial businesses.
- 4) Wells used exclusively for fire-fighting purposes if the wells are capped, locked and are used only in fighting fires.
- 5) Wells within Designated Groundwater Basins may be registered provided they do not exceed 50 gpm and are used for not more than three single family dwellings and the irrigation of not over one acre of home gardens and lawns, or the watering of livestock on range and pasture. They may be used in one commercial business, but may be further restricted by applicable Ground Water Management District Rules and Regulations.

The Form must be typewritten or printed in **BLACK INK**. Initial and date any changes you make on the form. **Incomplete forms are not acceptable and will be returned. Attach additional sheets if more space is needed.**

**The non-refundable fee for filing a late registration is \$60.00 payable to the "State Engineer". If the late registration is accompanied by an application for a permit to replace the existing well in the same aquifer, there is no additional fee.**

1. Print the well owner's name and include the mailing address and phone number.
2. If the well location is different than the mailing address of the owner, include the address where the well is located. North Well. The actual well location must include 1/4, 1/4, Range, Township, Section and distances from Section lines. Mark the appropriate boxes for North or South and East or West directions.
3. Describe the use(s) to which the water has actually been applied.
4. Enter the date of first beneficial use by the original owner. This date must be prior to May 8, 1972.
5. Enter the total depth of the well.
6. Enter the pumping rate of the well in gallons per minute.
7. The annual amount of water diverted in acre feet must be indicated. One acre foot is equivalent to 325,900 gallons. A typical home with lawn and garden irrigation diverts an average of one acre foot. Average home use that does not include lawn and garden irrigation (watering) diverts 1/3 acre foot.
8. Report the area irrigated either as one acre, fraction of one acre or square feet by filling in the correct number and check the appropriate box. You must describe the specific area irrigated using either the legal description of that land or by referencing the Subdivision, Lot, Block and Filing or Unit number. The watering of home gardens and lawns is considered irrigation and must be reported. If the well is not used for irrigation, place a zero in the acres irrigated blank. One acre is equivalent to 43,560 square feet.
9. The well owner must sign the form. Print or type your name in the first block if it is different from Item No. 1. If signing as a representative of a company who owns the well, then your title must also be included in the first block. Sign the second block and date the last block.

The existence and use of the well must be verified by field inspection before the registration can be evaluated. For an inspection, contact the Division Office where your well is located.

If a field inspection cannot confirm a claimed historic use, you may have to provide other evidence or affidavits to support such claim.

Water Divisions and offices are based on the major river drainage areas. For example, the Division One office administers the South Platte River Basin.
