COMMENTS:

Seasonal removal of pit netting.
Removal of water impoundment netting during winter months (currently underway) due to snow loading and lack of seasonal Sage Grouse habitation. Pit is located at over 8,000 ft. elevation on private land and freezes over during winter months. No free product will accumulate on the pit surface. Nets will be reinstalled before Sage Grouse nesting season begins on March 1st. 8' wildlife fencing around pit will remain intact year round.

H2S REPORTING

Description

	Netting needs to be reinstalled over fluid pits upon thawing of the pits' contents, or no later than 04-01-14.
	Netting can be removed during the winter (as requested) as long as the pit is frozen during the winter. If part of the pit does not freeze due to pumping or discharge of produced water into the pit, then that section of the pit must be netted and isolated so that no access to the water is possible for birds and other wildlife. It is the responsibility of the operator to protect wildlife from having access to (unfrozen) water of the pit.
