Final reclamation complete, site ready for inspection. Per Rule 1004.c(4) describe final reclamation procedure in Comments below or provide as an attachment.

Field inspection will be conducted to document Rule 1004.c. compliance

Comments:

The following describes the interim reclamation procedures and associated mitigation measures performed:

- Previously disturbed areas were re-contoured, slopes were reduced and re-seeded. A uniform vegetative cover density of 80 percent of the pre-disturbance levels has been achieved.
- Areas that were not used for production facilities, access roads, or other production operations have been stabilized with vegetation. Areas still in operational use, such as the well pad and access road areas, were stabilized with the use of permanent physical erosion reduction methods and maintenance will be performed as needed. The location will continue to be monitored for noxious weed infestations and stormwater BMPs.
