**COMMENTS:**

The conductor is capped. See note below from Mr. Lynn Cass; Drilling Superintendent. Form 42 Attached. That conductor is closed also on the same pad. I just did one form 42 for re-inspection to cover ourselves for that pad as the inspection notice states (no follow up inspection required). From the language in the inspector comments it seems they were more worried that the conductor notifications were not in the State database when the conductors were spud. That was before my time and I don't even have a record for when those were installed.

Regards,

L. Cass
