

Geologist Information

General: Existing location (17 new wells 1 existing)
Ownership: Fed Surface, Split Minerals
SUA Status: EA Needed – maybe only CX since existing
Spacing Units: Federal unspaced
Adjacent Owners: Bosley, Williams

Plan of Development

Access: Will use existing access
Drilling: Efficiency rig
Cuttings: Cuttings will be hauled to the SG Cuttings Trench next to the SG 22-32 pad.
SIMOPS: Yes
Completion: Frac from SG 34-28 with water storage at the SG Completions Pit (31-32-796). Will run a 10" water supply line from water storage area to SG 34-28 pad along pipeline ROW that is on CDOT ROW
Flowback: Flow back on pad.
Prod Equip: Production Equipment to be set along the west side of the access road.
Pipeline: A new 12" gas/4" water line will be installed along access road. Old gas line will be removed. Gas line to be tied into 12" main line in state ROW. Water line does not have another line to tie-into yet but may in the future. No further disturbance is needed.

Legend
