Form 2A COAs:

Group	User	Comment	Date
OGLA	allisonr	Land-farming of E&P waste is prohibited on the location. This shall not preclude onsite disposal of E&P waste in accordance with COGCC Rules and permit conditions.	01/29/2013
OGLA	allisonr	The Operator shall employ reduced emissions Well Completions as described in Rule 805.b.(3).	01/29/2013
OGLA	allisonr	Provide 48 hours notice to COGCC via Form 42 prior to construction of the location.	01/29/2013
OGLA	allisonr	If drill cuttings will be land applied at an offpad location, then a Waste Management Plan meeting the general requirements of Rule 907.a. must be submitted for the land application of drill cuttings. Submit the Waste Management Plan on a Form 4 Sundry Notice via email to DNR_OGCC.ENVIROSONDRY@state.co.us prior to drilling.	01/29/2013
OGLA	allisonr	Provide vehicle tracking control to prevent tracking site debris, mud or sediment onto public roads.	01/29/2013
OGLA	allisonr	The operator shall notify the Director of the intent to begin interim reclamation and intent to terminate the Colorado Department of Health and Environment construction stormwater permit. The notification shall include the Post-Construction Stormwater Program described in Rule 1002.f.(3) including facility-specific maps described in Rule 1002.f.(3).c.	01/29/2013

OGLA	allisonr	Location is in a sensitive area because of close proximity to steep slopes and to surface water, therefore, operator must ensure 110 percent secondary containment for any volume of fluids contained at the well site during drilling and completion operations.	01/29/2013
OGLA	allisonr	Review Larimer County requirements for access to County Roads and MIRU.	01/29/2013
OGLA	allisonr	The Operator shall comply with all applicable Colorado Department of Health and Environment - Air Pollution Control Division Regulations.	01/29/2013
OGLA	allisonr	Prior to construction of the location, the Operator shall submit to the Director a copy of the construction stormwater permit issued by the Colorado Department of Health and Environment.	01/29/2013
OGLA	allisonr	Location is on steep slopes; therefore the cut and fill slopes should be constructed in such a manner to manage site drainage and slope stability. Slopes should be stabilized as soon as is practical after the location has been constructed.	01/29/2013

Wildlife BMPs:

BMP Type	Comment
Final Reclamation	Reclamation <ul style="list-style-type: none"> • Interim and or final reclamation of the site will be completed per the Colorado Oil and Gas Conservation Commission rules and regulations
Material Handling and Spill Prevention	Solid Waste <ul style="list-style-type: none"> • The site will be cleaned of all trash and waste as soon as practical • All waste will be stored in sealed containers until it can be disposed of appropriately • Solid waste will be removed from the site and disposed of per state regulations for solid waste Spill Prevention <ul style="list-style-type: none"> • All materials, waste, and fluids kept on site will be stored in an appropriate manner to prevent contamination with the environment • If a spill occurs, it will be cleaned up using absorbent materials and by removing the contaminated soil • Any contaminated soil will be placed in a sealed container than can be disposed of appropriately • All efforts will be made to prevent the spill from migrating off-site or coming into contract with stormwater runoff • The Spill Control and Countermeasures plan, if applicable, will address and control all spill procedures
Storm Water/Erosion Control	Stormwater <ul style="list-style-type: none"> • When site disturbance is greater than one acre, a stormwater discharge permit will be completed per state regulations • Stormwater best management practices will be installed in accordance with the stormwater management plan • All stormwater best management practices will remain in place until final stabilization is achieved
Site Specific	Noxious Weeds <ul style="list-style-type: none"> • Site will be inspected to document weed infested areas • Prompt action will be taken to mitigate infested areas • Machinery will not be parked in weed infested areas • Vehicles sent off site regularly will be inspected to assure that undercarriages and grill works are kept free of weeds • Undercarriages of vehicles or machinery potentially contaminated with noxious weed seeds will be washed before entry is made into non infested areas

Inspector Name: Rickard, Jeffrey

Construction

Fugitive Dust and Vehicle Tracking

- Traffic speeds will be limited to control dust
- Watering will be completed to control fugitive dust as needed
- Graveled entries will be provided for vehicle tracking control
- Furrowing of disturbed soil will be provided at right angles to prevailing winds as needed
- Silt fences will be installed for wind break and erosion control
