Jake,

I have reviewed the referenced Form 2A and need some additional information. You have indicated this proposed oil and gas location is on Non-Cropland (Rangeland). This requires that a Reference Area Map and Reference Area Photos be included with the Form 2A. See COGCC Rule 303.b.(3)G for specifics on what the Reference Area Map and Photos must include.

If you have any questions, please feel free to contact me. Thank you.

Cc: "Deranleau - DNR, Greg" <greg.deranleau@state.co.us>

Again, can you please explain exactly what a reference area map need to have on it? I have also attached the photos again which were taken May 29th, 2013 which I assume was in the growing season.

Thanks

Jake

Jake,

The COGCC definition for a Reference Area is within the 100 series of our Rules. Please review our definition of Reference Area. The Reference Area Map is a topo map showing the proposed oil and gas location **AND** the location of your chosen Reference Area. Reference Area Pictures are four color photographs of the Reference Area, taken during the growing season of vegetation and facing each cardinal direction. Each photo shall be identified by the date taken, well or Oil and Gas Location name, and direction of view. The Reference Area photos may be submitted at any

time up to 12 months after the Form 2A. The two attachments you included do not satisfy the requirement for a Reference Area Map and Reference Area Photos as they only show your proposed Oil and Gas Location.
