Michael,

I have reviewed the referenced Form 2A Oil & Gas Location Assessment and have a few comments.

- 1) Per COGCC Rule 303.b.(3)C, please provide me with a description of all oil, gas, and/or water pipelines that are planned for this proposed oil and gas location and I will add it to the Form 2A.
- 2) During my review it appears that the nearest Building you have identified as being approximately 2,070 feet from the proposed oil and gas location is a house. This would also make it the nearest Building Unit. Therefore, I will change the Building Unit distance in the Cultural Distance section of the Form 2A.
- 3) During my review it appears the nearest Public Road is Weld County Road 133 approximately 2,215 feet east of the proposed oil and location. Therefore, I will change this distance in the Cultural Distance section of the Form 2A.

Please respond to this correspondence by April 3, 2014. If you have any question, please feel free to contact me. Thank you.

To: "Andrews - DNR, Doug" <doug.andrews@state.co.us>

Doug,

Here is my response to your concerns below.

- 1) Onsite pipelines, All pipe is 3" Sched 80 welded steel underground. 340' from the wells to the treater. 125' (2 lines) one oil and one water from the treater to the tank battery, 125' carrying gas from the treater to the flare.

2) I will agree to this.

3) Per the County Assessor GIS and ownership plats CR 133 ends at the NE corner of Section 24, T10N-R58W and so the distance should not be changed.

Let me know if you need any additional information.

Sincerely,
Michael L. Brown
