COMMENTS:

After discussion with Doug Andrews regarding Spaur Brothers North, Great Western has agreed to the conditions of approval with the exception of "G" that states the TLVST's will be filled up incrementally. Instead we have agreed that someone from Great Western Operating Company will be on site to observe the tank being filled and check for leaks at that time. This falls in line with our compliance of "D" which states the site preparation and installation oversight will be provided by a Professional Engineer or our designated representative.
