Comment:

Surface casing was preset due to rig availability. The Rig was released on 1/24/2009. Anticipated date for resumed Drilling was going to be first quarter 2010.

2/04/09 Preliminary Form 5 filed with Surface Cement Report, no directional report, no logs run.

8/2013 Development team ok'd approval for team to plug and abandon this surface casing.

The BHF were calculated from the directional survey attached last footage of 1785', surface csg set @ 1833'.

The directional footages at the top of the Production zone input are the same as permitted footages to get the Form 5 to be able to submit.

The plugging is planned for 2014 plugging season.

Encana requests continued Shut In Status for this surface csg, this well has been shut in since 1/24/09, To insure the well is closed to the atmosphere the surface Csg set with QDC 3M cap.

I hereby certify all statements made in this form are, to the best of my knowledge, true, correct, and complete.
