Justin,

I have reviewed the referenced Form 2A Oil & Gas Location Assessment and have the following comment.

During my review of your various attachments and drawings it appears the disturbed area will overlap onto the Bresser-Truckton sandy loams, 5-20 percent slopes NRCS Soil Map Unit. Please send me the NRCS Soil Map Unit Description for this soil unit and I will add it to the Form 2A.

Please provide the requested information by April 17, 2014. If you have any questions, please feel free to contact me. Thank you.
