To: OGCC EnviroScan - DNR <dnr\_ogcc.envirosan@state.co.us>

Amber,

Please upload the attached document to location id 313162. Please add this COA, "Scaled maps/drawings of the spill shall be provided with the proposed area(s) to be scrapped and removed provided on the drawing(s). Following remedial activities, an adequate number of discrete soil samples shall be collected and analyzed for BTEX, TPH (DRO and GRO), pH, EC, and SAR. At least one sample shall be collected and analysed for the complete 910-1 list (including PAHs)"

Please scan this email communication to the location, under the title, "Form 27 communication and COA"

Duane,

It is suggested that the operator retain the services of an environmental professional or environmental consulting firm to define the extent of impact.

Yates will need to follow up with a detailed remediation plan and confirmation soil sampling plan. Please provide this by March 11, 2014, and in the mean time provide weekly visible inspections of the area.

Thanks for your continued commitment to this project and getting it closed out.

Kris,

See attached the Form 27 you requested.

We will have to wait for snow melt and breaks in the weather to begin clean-up of the off lease area. I will keep you posted.

Regards,

Duane.
