

A plan view map showing the layout of the proposed well pad area. The map includes the following features from top to bottom:

- Existing Well:** Represented by a horizontal dashed line with black dots.
- Proposed Road:** Represented by a horizontal line with two parallel solid lines above and below it.
- Field Road:** Represented by a horizontal dashed line.
- Borepath:** Represented by a thick solid blue horizontal line.
- Proposed Well Pad:** Represented by a horizontal rectangle with a solid black border.

Existing Well

Proposed Road

Field Road

Borepath

Proposed Well Pad

The diagram shows a plan view of the proposed well pad area. It includes an existing well (dashed line), a proposed road (blue line), a field road (dashed line), a borepath (blue line), and the proposed well pad (rectangle). The well pad is located south of the borepath and field road, and east of the proposed road. The existing well is located north of the proposed road.
