**Inspector Comment:**

Field inspection to follow up on landowner (a surface developer) request regarding an orphan well. Operator no longer in business, and no bonds available (plugging bond previously claimed in 2002). An open casing is present at the surface. At a minimum, the surface plug needs to be re-set, but further evaluation on existing plugs is necessary to determine the full scope of plugging work. A 300 bbl steel tank and other junk, including a surface flowline, are on location. Some oil staining around the base of the tank. Access to this location is fairly easy, next to a county road.
