Brandon,

COGCC has reviewed the Form 27 Site Investigation and Remediation Workplan submitted by PDC Energy, Inc. for the Steinmetz 1, 21-17 water vault removal. Based on the information presented in the Form 27, it appears that no further action is necessary at this time, and COGCC approves the closure request. However, should future conditions at the site indicate contaminant concentrations in soils exceeding COGCC standards or if ground water is found to be significantly impacted, then further investigation and/or remediation activities may be required at the site.

COGCC has assigned Facility ID 436627 to track the centralized tank battery for the Steinmetz #1, 21-17 production facility.

Amber - will you please process the attached Form 27 and relate it to API 05-123-12528 and Facility 436627 and let everyone know the project number?

Thank you.

**Form 27 Produced Water Vessel Closure Submittal**

Afternoon Rick,

Attached please find a Form 27 partially buried produced water vessel closure request and supporting documentation for the above referenced subject site. PDC removed the vessel at this location and collected a sample at the base of the excavation. Based on the laboratory analytical results, PDC is requesting a vessel closure for this location and a request for No Further Action.

Please contact me if you have any questions regarding this project.

Amber

Here are the two Steinmetz attachments. Sorry for the mixup.

Rick, this signed 27 looks to be for a different location. Also, it is missing your name.

Everyone

The signed Form 27 is now attached. The last email didn't include the signed Form.
