SUNDRY NOTICE

Submit a signed original. This form is to be used for general, technical and environmental sundry information. For proposed or completed operations, describe in full in Comments or provide as an attachment. Identify Well by API Number; identify Oil and Gas Location by Location ID Number; identify other Facility by Facility ID Number.

OGCC Operator Number: 96850 Contact Name Karolina Blaney
 Name of Operator: WPX ENERGY ROCKY MOUNTAIN LLC Phone: (970) 6832295
 Address: 1001 17TH STREET - SUITE #1200 Fax: (970) 2859573

OTHER CHANGES

☐ **REMOVE FROM SURFACE BOND** Signed surface use agreement is a required attachment

☐ **CHANGE OF WELL, FACILITY OR OIL & GAS LOCATION NAME OR NUMBER**

From: Name TR _____ Number 31-5-697 Effective Date: _____

To: Name _____ Number _____

☐ **ABANDON PERMIT: Permit can only be abandoned if the permitted operation has NOT been conducted. Field inspection will be conducted to verify site status.**

☐ WELL: Abandon Application for Permit-to-Drill (Form2) – Well API Number _____ has not been drilled.

☐ PIT: Abandon Earthen Pit Permit (Form 15) – COGCC Pit Facility ID Number _____ has not been constructed (Permitted and constructed pit requires closure per Rule 905)

☐ CENTRALIZED E&P WASTE MANAGEMENT FACILITY: Abandon Centralized E&P Waste Management Facility Permit (Form 28) – Facility ID Number _____ has not been constructed (Constructed facility requires closure per Rule 908)

OIL & GAS LOCATION ID Number: _____

☐ Abandon Oil & Gas Location Assessment (Form 2A) – Location has not been constructed and site will not be used in the future.

☐ Keep Oil & Gas Location Assessment (Form 2A) active until expiration date. This site will be used in the future.

Surface disturbance from Oil and Gas Operations must be reclaimed per Rule 1003 and Rule 1004.

☐ **REQUEST FOR CONFIDENTIAL STATUS**

☐ **DIGITAL WELL LOG UPLOAD**

☐ **DOCUMENTS SUBMITTED** Purpose of Submission: _____

RECLAMATION

INTERIM RECLAMATION

☐ Interim Reclamation will commence approximately _____

Per Rule 1003.e.(3) operator shall submit Sundry Notice reporting interim reclamation is complete and site is ready for inspection when vegetation reaches 80% coverage.

☐ Interim reclamation complete, site ready for inspection.

Per Rule 1003.e(3) describe interim reclamation procedure in Comments below or provide as an attachment and attach required location photographs.

Field inspection will be conducted to document Rule 1003.e. compliance

FINAL RECLAMATION

☐ Final Reclamation will commence approximately _____

Per Rule 1004.c.(4) operator shall submit Sundry Notice reporting final reclamation is complete and site is ready for inspection when vegetation reaches 80% coverage.

☐ Final reclamation complete, site ready for inspection. Per Rule 1004.c(4) describe final reclamation procedure in Comments below or provide as an attachment.

Field inspection will be conducted to document Rule 1004.c. compliance

Comments:

ENGINEERING AND ENVIRONMENTAL WORK

☐ NOTICE OF CONTINUED TEMPORARILY ABANDONED STATUS

Indicate why the well is temporarily abandoned and describe future plans for utilization in the COMMENTS box below or provide as an attachment, as required by Rule 319.b.(3).

Date well temporarily abandoned _____ Has Production Equipment been removed from site? _____

Mechanical Integrity Test (MIT) required if shut in longer than 2 years. Date of last MIT _____

☐ SPUD DATE: _____

TECHNICAL ENGINEERING AND ENVIRONMENTAL WORK

Details of work must be described in full in the COMMENTS below or provided as an attachment.

☐ NOTICE OF INTENT Approximate Start Date _____

COMMENTS:

Attached with this COGCC Form 4 is the TR 31-5-697 Sampling Summary Report for the groundwater samples collected in the second and third quarter of 2013 along with wells logs and completion diagrams for the three additional monitoring wells which were installed in June of 2013. The COGCC remediation number is 5258.

Well installation and sampling summary:

On June 19 and 20, 2013 a CME 55 LC track rig was utilized to drill three additional monitoring wells in an effort to further define the extent of groundwater contamination down-gradient of existing monitoring well MW4.

MW-5 was drilled to a total depth of 40 feet. Based on field observations it was completed in the weathered shale and siltstone deposits. No evidence of hydrocarbon impact was observed in the entire drilling interval. The subsurface was very moist to saturated from 28-40 feet bgs. 20 feet of screen was installed beginning at 20 feet bgs to the total depth of 40 feet bgs (see attached well summary diagram).

On July 11, 2013 depth to groundwater was recorded at 29.47 feet below top of casing and samples were collected (see attached data summary table 1 and 2). Analytical results indicate no hydrocarbons are present.

MW-6 was drilled to a total depth of 30 feet. Based on field observations it was completed in gravel, sand, and silt deposits. No evidence of hydrocarbon impacts were observed in the entire drilling interval. The subsurface was very moist to saturated from 20-30 feet bgs. 15 feet of screen was installed beginning at 15 feet bgs to the total depth of 30 feet bgs.

On July 11, 2013 depth to groundwater was recorded at 25.35 feet below top of casing and samples were collected. Benzene concentrations tested at 1.5 ug/L which is below the COGCC allowable concentrations for groundwater.

MW-7 was drilled to a total depth of 30 feet. Based on field observations it was completed in clayey gravel deposits. No evidence of hydrocarbon impact was observed in the entire drilling interval. The subsurface was very moist to saturated from 25-30 feet bgs. 15 feet of screen was installed beginning at 15 feet bgs to the total depth of 30 feet bgs.

On July 11, 2013 depth to groundwater was recorded at 28.42 feet below top of casing and samples were collected. Analytical results indicate that no hydrocarbons are present.

The results of the second and third quarter water sampling of all monitoring wells installed for this project are summarized in the attached summary table 1 and 2. The results indicate that the benzene levels continue to decrease in MW-2, MW-3, and MW-4. WPX is evaluating this data in order to propose remedial actions to enhance natural attenuation of this site. The remediation proposal will be submitted to COGCC via a subsequent Form 4.

H2S REPORTING

Data Fields in this section are intended to document Sample and Location Data associated with the collection of a Gas Sample that is submitted for Laboratory Analysis.

Gas Analysis Report must be attached.

H2S Concentration: _____ in ppm (parts per million)

Date of Measurement or Sample Collection _____

Description of Sample Point:

Absolute Open Flow Potential _____ in CFPD (cubic feet per day)

Description of Release Potential and Duration (If flow is not open to the atmosphere, identify the duration in which the container or pipeline would likely be opened for servicing operations.):

Distance to nearest occupied residence, school, church, park, school bus stop, place of business, or other areas where the public could reasonably be expected to frequent: _____

Distance to nearest Federal, State, County, or municipal road or highway owned and principally maintained for public use: _____

COMMENTS:

Best Management Practices

No BMP/COA Type
