COMMENTS:

Spill/Release tracking number is 2145817.

Attached are the laboratory reports and the sample location map for samples collected at the GV 19-36 well pad to confirm that the soil impacted by the produced water release that occurred on July 24, 2013 meets the COGCC cleanup requirements specified in the COGCC 900 Series rules.

The impacted soils in the vicinity of the compromised line and bar ditch were excavated. Confirmation samples were then collected from the bottom and walls of the excavation and from the access road bar ditch. All were analyzed for Table 910-1. Analytical results indicated compliance with Table 910-1 standards for hydrocarbon. The excavation was backfilled with clean material. The impacted soil from the release was treated on-site for hydrocarbons. One composite sample was collected from the landfarmed material which tested below the COGCC cleanup requirements specified in Table 910-1.

Based on these results, WPX respectfully requests closure of this incident.

H2S REPORTING

Data Fields in this section are intended to document Sample and Location Data associated with the collection of a Gas Sample that is submitted for Laboratory Analysis.

Gas Analysis Report must be attached.

H2S Concentration: _____ in ppm (parts per million) Date of Measurement or Sample Collection _____

Description of Sample Point:

Absolute Open Flow Potential _____ in CFPD (cubic feet per day)

Description of Release Potential and Duration (If flow is not open to the atmosphere, identify the duration in which the container or pipeline would likely be opened for servicing operations.):

Distance to nearest occupied residence, school, church, park, school bus stop, place of business, or other areas where the public could reasonably be expected to frequent: _____

Distance to nearest Federal, State, County, or municipal road or highway owned and principally maintained for public
