Doug,

I am working with Collin Richardson at Mineral Resources on the Triple Creek Location Assessment. Please see the attached revised location assessment. The location of the tank battery and emission control devices were shifted north approximately 50 feet to ensure that all production equipment is at least 1000' from all residences.

Let me know if you have any questions or need additional information.

Thanks,

Erin

Erin,

Has the City of Greeley required any noise and/or visual mitigation requirements for Mineral Resources' Triple Creek location as part of the USR process? I'm also curious if the homeowner that is located where the Access Road comes off of 71st Avenue is aware that there will be an increase in oilfield traffic going right by his home soon?

Also due to the proximity of Sheep Draw to this oil and gas location, I'd like to add the following Condition of Approval:

"Operator must implement site-specific best management practices in accordance with good engineering practices, including, but not limited to, construction of a berm or diversion dike, site grading, or other comparable measures, sufficient to protect Sheep Draw located approximately 800 feet northwest of the oil and gas location from a release of drilling, completion, produced fluids, and chemical products."

Please let me know by February 16, 2014. If you have any questions please feel free to contact me. Thank you.

Doug,

Thanks for the email. To date we have not started the USR Process with the City of Greeley. We are in the process of scheduling the Pre-application meeting with the City. It looks like that meeting may be held at the end of this week or perhaps next week. I will keep you informed as to when that meeting will take place. In accordance with other USRs with the City I would assume that both visual and noise mitigation will be required.

I will meet with Mineral Resources to see if they have meet with the home owners, particularly the ones near the access road. I will also have them review the proposed COA.

Thanks,

Erin

Erin,

Its been about a month since I last corresponded with you on this Mineral Resources location. Have you heard any recent word on whether noise and/or visual mitigation will be required as part of the USR? Also, is Mineral Resources okay with the proposed COA? Has Mineral Resources met with the homeowner to inform him that he is going to have an increase in oilfield traffic go right past his home soon? I'm just trying to get a sense of how neighborly Mineral Resources is being with regard to that homeowner.

Please let me know by February 28, 2014. If you have any questions, please feel free to contact me. Thanks.

Doug,

Thanks for the email.

Mineral Resources had a pre-application meeting with the City of Greeley on January 30, 2014. At that meeting, city staff asked that our first submittal to the city be a Scoping Submittal, which is a "pre" submittal to allow the city to generate comments. That submittal was made to the city on February 7, 2014. We do not have the comments from the city at this point.

Mineral Resources accepts the COA.

At this point, Mineral Resources has not meet with the neighbors.

I do have another question for you. In light of the new MLVT policies, Mineral Resources intends to use up to 3 MLVTs on the property. How should we indicate this on the Form 2A? Do you want me to submit a new location drawing showing the proposed locations.

Thanks,

Erin

Hi Doug,

I wanted to check in with you regarding Mineral Resources' Form 2A for the Triple Creek directional project. Did Collin Richardson or anyone else from Mineral Resources contact you regarding the MLVTs for this site? I was told they were going to discuss this with you.

Thanks,

Erin
