Comments McPherson A10 APD Refile. All attachments to the previous submittals remain unchanged and are not reattached with this submittal. The proposed proposed TD, casing and cement program, BHL and mineral lease information have not changed from the Sundry Notice Form 4 approved 8/2/11. Please note: conductor has been set on the subject well - casing tab is updated with actual conductor data. There have been no changes to land use, well construction or the lease. This Refile Form 2 does not require a Form 2A because the pad has been constructed, a closed loop system is being used so no pits need to be constructed, the refilled well will not require any expansion /additional surface disturbance of the pad. The location is not in a wildlife restricted surface occupancy area (RSO); consultation with CDOW is not required and the location does not require a variance from any of the rules listed in Rule 306.d.(1).(A).(ii).; consultation with CDPHE is not required. Top of cement of 1st string / production casing will be >500' above top of gas.

Distance to nearest well penetrating / completed in same formation has been updated using reference well Weinreis A4 (API 05-045-15129).
