Bill Barrett Corporation ("BBC") respectfully requests the Director to approve BBC's alternate logging program as allowed and referenced within Rule 317.o.

BBC proposes to run the following on one of the first wells on the above-referenced multi-well pad:

| Log Type | Interval |
|-----------------------------------|---|
| Cased-hole neutron with gamma ray | Intermediate hole - deepest depth obtainable in the 7" casing to ground level |
| CBL/GR | Top of liner hanger to surface |
| MWD w/GR | KOP to TD |
| Mud | KOP to TD |

The Form 5 will report that alternative logs were run per a Rule 317.o Exception and will identify the well (with API#, well name & well number) that was logged with the alternative logs. The form 5 will also include a comment that no open-hole logs were run.

Should you have any questions, please contact me at 303-312-8511. Thank you for your consideration.

Sincerely,
