Inspector Comment:

Overall inspection status at this time is Satisfactory. The signage on each of the produced water tanks has been added since last inspection (#669400438 on 2/11/2013) and currently meets rule 210d. The bird protector has been added to the horizontal heated separator. The compressor skid spill prevention runners have no standing fluid at this time. The stained soils from lube oils have been removed from around the compressor, however, there is existing gravel staining that may have occurred since the previous cleanup. This area is located where the fluid dump line leaves the compressor skid. There is also some soils staining inside the berm of the 20 bbls open top tank where the dump line discharges produced water. Stained soils/ gravel need to be remediated and the housekeeping efforts should be a continued process. Pictures Uploaded.
