James,

COGCC has assigned Remediation #8391 and document #2148710 to the Form 27 for the Brontosaurus#1.

Please refer to these numbers in future correspondence. Based on the information provided, COGCC conditionally approves the Form 27 and concurs that No Further Action for the removal/excavation will be required. The Environmental Assessment Report submitted by Western Environmental Technologies will be added to the Remediation file.

COGCC approves the Form 27 with the following conditions of approval:

1. Provide COGCC a detailed map that shows the sample location, sample coordinates (latitude and longitude) sample depth, and the excavation footprint.
2. Submit disposal tickets to COGCC.

Final surface reclamation must meet COGCC 1003 series and 1004 series rules for subsidence and vegetative cover. Please retain a copy of this email as confirmation the No Further Action for the removal/excavation. A copy of the approved Form 27 is attached for your records. Feel free to call or email if you have questions or concerns.

Thank you,

John Noto

Cc: Remediation #8391
