Wolf Creek Unit-Govt #5, SWNE 1 9S 90W, Facility #314165, Remediation Project #7995

COGCC has reviewed the response to the Conditions of Approval document submitted by SourceGas on behalf of Rocky Mountain Natural Gas, LLC for the above referenced location.

The response to the 5th bullet listed under the Conditions of Approval (COAs) for Remediation #7995 states that "The piezometers were installed on September 16, 2013. See Attachment D." The Piezometer/Sample Location Map provided illustrates four Proposed Piezometer/Sample Locations (SS09 – SS12) as "not installed" and only one Proposed Piezometer/Sample Location (PIEZ12/SS13) as "installed." Please clarify and/or provide an approximate date for the installation of the four remaining proposed piezometers, as requested in the COAs.

All other COAs appear to have been adequately addressed in the responses provided by SourceGas. **Please reference both the Location ID number #314165 and the Remediation Project #7995 on any future correspondence.**

Please contact Alex Fischer if you have any questions.

Thank you,

Ann C Eckman, PG for
