Describe what is known about the spill/release event (what happened -- including how it was stopped, contained, and recovered):

On Monday (05-05-2014) at approximately 4:30 PM a water leak occurred on a 3" injection line, coated spool, at Weyrauch 2-36. Approximately 30 BBLs of brine water and 0 BBLs of oil were released. The line was shut in immediately upon detection. Vacuum trucks removed all of the free fluid; estimated recovery was approximately 29 BBLs of brine water and 0 BBLs of oil were recovered. The fluids that were picked up were taken to the truck unloading facility at the Main Water Plant for recycling. The affected was water washed and soil samples will be taken.
