Amber,

Please close this form 27 (Doc. # 2148543) with a form 27A. I submitted the original form 27 on April 15, 2014. Please data enter/upload to REM #8336, API #05-067-08097, and location ID 326438.

Please close this remediation plan with the following language:

Based on our review of this information, COGCC concurs that there is no apparent impact to soil associated with the recently replaced partially buried produced water tank. Should conditions at the site indicate contaminant concentrations in soils exceeding COGCC standards or, if ground water is found to be significantly impacted, further investigation and/or remediation activities may be required at the site. Final surface reclamation must meet the COGCC 1004 series rules for vegetative cover.

Thank you,

Jim Hughes
