Paul,

COGCC has reviewed the Form 27 Site Investigation and Remediation Workplan, and the Form 4 Sundry Notice submitted by Kerr McGee Oil & Gas Onshore for the Stenzel 1-13 location (Remediation Project 8258 / Facility ID 435348). Based on the information presented, it appears that no further action is necessary at this time, and COGCC approves the closure request. However, should future conditions at the site indicate contaminant concentrations in soil exceeding COGCC standards or if ground water is found to be significantly impacted, then further investigation and/or remediation activities may be required at the site. The Spill report #2146353 and Remediation Project #8258 have been changed to resolved status in the Colorado Oil & Gas Information System.

Please contact me with any questions regarding this project.

Regards,

Rick Allison, P.G.
