### COMMENTS:

Due to high production volumes an additional compressor is needed for this facility location. An updated equipment inventory is attached. Due to the location being at the edge of farm acreage, the permitted disturbance has been seeded very close to the facility (Location Drawing). There will be a small expansion back into the permitted disturbance due to the distance required between facility equipment. NEI is working with the surface owner on this. A Location Drawing, As-Built Drawing, aerial photo showing location of the sound mitigation, and equipment inventory are attached. NRCS Map: 1 - Altvan Fine Sandy Loam 0-6% slope.

## H2S REPORTING
