H2S REPORTING

Data Fields in this section are intended to document Sample and Location Data associated with the collection of a Gas Sample that is submitted for Laboratory Analysis.

Gas Analysis Report must be attached.

H2S Concentration: _____ in ppm (parts per million) Date of Measurement or Sample Collection _____

Description of Sample Point:

Absolute Open Flow Potential _____ in CFPD (cubic feet per day)

Description of Release Potential and Duration (If flow is not open to the atmosphere, identify the duration in which the container or pipeline would likely be opened for servicing operations.):

Distance to nearest occupied residence, school, church, park, school bus stop, place of business, or other areas where the public could reasonably be expected to frequent: _____

Distance to nearest Federal, State, County, or municipal road or highway owned and principally maintained for public use: _____

Operator Comments:

In accordance with landowner approval, excess material on the J-13 pad that requires landfarming to decrease contaminant concentrations below the Table 910-1 standards will occur on the LINN Energy I-11 pad. Due to previous interim reclamation work on the J-13 pad that revealed the existence of this material, and the reclaimed location's decreased size, material will be hauled off-site to the I-11 pad where landfarming will take place. Periodic soil sampling will be conducted to monitor landfarming efforts and determine when backfilling can begin. It is estimated that landfarming activities will last for approximately 2 years, depending on soil and weather conditions. Once clean, this material will be spread on the I-11 pad and used in reclamation of that site.

I hereby certify all statements made in this form are, to the best of my knowledge, true, correct, and complete.
