Kerry: I spoke with Chris Chavez a few minutes ago regarding clean-up of the oil spills. He confirmed contact by Corey Veach. He also confirmed viewing the spills. Corey represented to Chris that Monument would not clean-up the spills and, therefore, he had to do so. I advised Chris that Monument had been prevented by Corey Veach from cleaning up the spills. I also requested that he do nothing which would interfere with Monument's lease and operations.

Sincerely,

/s/

Don Freemyer

Tom – Thank you. As far as I am concerned, put in the fresh dirt. Karen, your feedback please.

Don

Denny and Shawna, please see thread below. Looks like we can now go sample. Please coordinate with Tom Fox in support of his cleanup efforts. Thanks, all.

You need to sample the area where the impacted soils were removed and demonstrate the excavated area meets Table 910-1 standards before you can backfill with any clean dirt. Please ensure you GPS the sample locations and analyze for all Table

910-1 soils constituents.

I have not seen the original soil samples (if available) from this spill so cannot approve a reduced sampling list until those data are provided so the COGCC can be assured of what constituents were non-detect in the original spill vs. those that were either detected or above standard.

Karen

Thanks , Karen. I have forwarded this conversation to Denny Foust and Shawna Chubbuck for them to take action and coordinate with Tom Fox. The analytical results will be sent to you along with a request to waive appropriate constituents from further testing. Email and cell phone will be the best way to reach me for a few more days as I'm working from home. Please do contact me or Denny with questions or concerns.

Thanks again.
