Subject: RE: Return to draft: Hebron 01-18HR; 400596809

Alyssa,

Please see my comments in red below.

1. Field selected as Wildcat but well appears to go through North Park Horizontal Niobrara (60120); **See the notes in the comments section which was initially added to clarify/explain this issue. E-forms system will not allow this field due to character constraints which the user has not control over. We have contacted the Commission on three separate occasions to get this rectified with no response.**
2. Selected as yes, being submitted with an O&G location assessment application, but no related document number is provided – **The document number 400598395 was added.**
3. Deviated drilling plan not attached. – **This was attached initially and is still attached. I have not reattached anything. Both PDF and Excel are in the E-forms system.**

I will resubmit. Let me know if you need more.

Thank you!

Kim

Subject: Return to draft: Hebron 01-18HR; 400596809

Hi Kimberly,

I have a few comments regarding this form:

1. Field selected as Wildcat but well appears to go through North Park Horizontal Niobrara (60120)
2. Selected as yes, being submitted with an O&G location assessment application, but no related document number is provided
3. Deviated drilling plan not attached.

Please review and resubmit. Let me know if you have any questions.

Thanks,
Alyssa
