### **Lincoln Trust/Pruski #3-22 ~ API # 05-067-08700 ~ SESW S22-T35N-R8W ~ La Plata County ~ Remediation Project #5250**

Mr. Montoya,

COGCC has received the Form 27 submitted for the closure of a former pit used as secondary containment for a produced water tank at the above referenced facility. The form has been approved and assigned Remediation #5250. According to Form 27, soil confirmation sample results were below concentration levels listed in COGCC Table 910-1, with the exception of arsenic. COGCC is not granting a formal variance to allow for existing concentrations of arsenic to remain in place at the site, as requested in Form 27; however a conditional closure is being issued in accordance with Table 910-1 footnote 1, since the arsenic concentration is consistent with background levels. Remediation Project #5250 has been closed in the COGIS database via Form 27A document #200408063. However, should future conditions at the site indicate contaminant concentrations in soils exceeding COGCC standards or if ground water is found to be significantly impacted, further investigation and/or remediation activities may be required at the site.

A copy of the signature page indicating that the form is approved is attached; please retain a copy of this email as verification of No Further Action required.

Thank you,

Jennifer Hussey, for

Jim Hughes
