Larry,

I have reviewed the referenced Form 2A Oil and gas Location Assessment and have the following comments.

1) You have indicated in the pipeline description that the Razor 25A, 25B, 25C, and 25D Pads will produce to this proposed oil and gas location. Therefore, the Related Remote Locations section of the Form 2A must be completed. Please provide me with either the Location ID# or the Form 2A Doc# for all locations that this Production location will serve. Also, if production facilities already located on any of these nearby related well pads will be removed when this Razor 25 Production location is constructed, you will need to submit a Form 4 Sundry Notices detailing that.

2) In the Cultural Distance section you have indicated the distance to the nearest Building Unit is 5,280 feet from the proposed oil and gas location. During my review I identified a Building Unit (a house) approximately 2,600 feet to the northeast. Therefore I would like to change this distance.

Please respond to this correspondence by July 27, 2014. If you have any questions, please contact me. Thank you.

Doug,

#1 Only the Razor 25D has a permitted location as the Razor 25-2514H LOC #43118. The other 2 have not been permitted and are planned but no proposed date for submitting the Form 2As

#2 Ok

Thanks,
