Subject: Idea - Remediation #8252

To: "Noto - DNR, John" <[john.noto@state.co.us](mailto:john.noto@state.co.us)>

John,

Attached are photos taken on Monday June 16, 2014 at our ongoing project at the Idea. The skim pit we are closing was located right next to the produced water pit which is making the soil removal process a bit dicey. We are waiting on the arrival of a large trackhoe that will enable us to complete the job.

We are going to submit a Form 27 –Permission to Land Farm on-site and remediate the soil at the location. The tank battery for the Idea and Gulley wells sits in a low area and accumulates water every time it rains or snows. The soils we reclaim from the skim pits will be used to build-up low areas.

Dave P.
