Denver, CO 80203

Conditions of Approval

Sooner Unit 13-16, API 05-123-13452

Spill Tracking #2147376

Remediation Project #85

COGCC Document #2614864

1. *Soil samples must be collected from beneath the point of release on the flowline and from the edges of the excavation to document compliance with Table 910-1 Standards in the horizontal and vertical directions. Discreet samples must be collected and analyzed for total petroleum hydrocarbons (TPH)-gasoline range organics and diesel range organics (TPH-GRO and TPH-DRO), benzene, toluene, ethylbenzene and total xylenes (BTEX). Composite samples are not acceptable.*
2. *If material is removed from the site for disposal, submit waste manifests or haul tickets to document the removal, transport and disposal of the material as required by Rule 907.b.*
3. *If onsite treatment or blending is used to remediate impacted soil, submit a treatment plan to COGCC that includes the amount and type of additives, nutrients or bioremediation products proposed to be used and a plan for monitoring the progress of the remediation. Any treatment of oil waste (material containing hydrocarbons in excess of the Table 910-1 concentration levels) must be handled in accordance with Rule 907.e.*
4. *Any material that is returned to the excavation must meet Table 910-1 Standards.*
5. *Consult with the affected Surface Owner regarding surface reclamation plans in accordance with Rule 906.c.(2).*
6. *Conduct surface reclamation in accordance with Rule 1003.e.*
7. *Notify COGCC when reclamation of the affected area has been completed. The notice shall be given as described in Rule 1003.e.(3). Reference Remediation Project Number 8549 in the Reclamation Notice.*

Ms. Jessica Donahue
