COMMENTS:

The well was producing and has a full production wellhead installed. The well was shut in by turning the valves on the wellhead tree and connecting piping to the shut position. The well has a history of plugging up and repeated clean-outs are no longer economic for this wellbore. The well will remain shut in until gas market conditions improve.

Description

Operator Comments:

The well is shut-in and Form 4 for continued shut-in status may not be required. Operator requests continued shut-in status at this time. Well is due for an MIT on or before October 1, 2014. MIT results and request for temporary abandonment status will be made if well is not returned to production prior to October 1, 2014.

I hereby certify all statements made in this form are, to the best of my knowledge, true, correct, and complete.
